
$p(A \mid X)$
$p(B \mid X)$
$p(A \mid B, X)$
$p(B \mid A, X)$
$J^{B \to A}$
$= p(B \mid X)p(A \mid B, X)$
$J^{A \to B}$
$= p(A \mid X)p(B \mid A, X)$
Candidate family: raw orders · arithmetic/geometric pools · Hard CoRe · Soft CoRe
Held-out validation selection: choose the candidate with the lowest validation NLL
Final joint $Q(A, B \mid X)$
